Summary

Aspiring Software Developer with experience in building scalable web applications using Django and Python. Skilled in backend development, database management, and optimizing application performance. Passionate about solving real-world problems and exploring AI-driven technologies.

Education

Vishnu Institute of Technology	Bhimavaram, Andhra Pradesh
Bachelor of Technology in Artificial Intelligence & Data Science	08/2022 - 04/2026
Aditya Junior College	Kakinada, Andhra Pradesh
Intermediate-MPC	06/2020 - 05/2022

Experience

APSSDC	
Django Developer Intern	05/2025 - 07/2025
- Designed and implemented a multi-app Django architecture for a Vehicle Service Management System, including authentication, service workflows, invoice generation, and role-based dashboards. - Collaborated in an agile team to integrate customer, mechanic, and admin modules with consistent data models and business logic. - Optimized backend performance by refining Django ORM queries, improving response time for customer and admin operations.	

Projects

Freelance Client Website
- Developed a responsive website for a school, showcasing academics, events, and student activities with intuitive navigation. - Delivered a user-friendly and mobile-responsive design for real-world client requirements. - Tech Stack: HTML, CSS, JavaScript, Vercel
Your Plan-B (AI Financial Assistant)
- Built an AI-powered financial assistant delivering personalized recommendations based on user data. - Implemented Retrieval-Augmented Generation (RAG) to improve response accuracy and contextual relevance. - Tech Stack: Python, RAG, Prompt Engineering
Vehicle Service Management System
- Developed a role-based Django web application enabling customers to raise service requests, mechanics to manage repair workflows, and administrators to handle approvals and billing. - Designed optimized backend workflows using Django ORM for efficient request processing, real-time tracking, and accurate invoice generation. - Tech Stack: Django, Python, SQLite, HTML, CSS
Blinkit Sales & Performance Dashboard
- Built a Power BI dashboard to analyze Blinkit sales, including product performance, customer trends, and overall revenue. - Used charts and visuals to present key insights such as sales, categories, and time-based trends. - Tech Stack: Power BI , Data Visualization

Skills

Programming Languages: Python · JavaScript
Frontend: HTML5 · CSS3 · Responsive Design · UI Layout Design
Frameworks: Django
AI & Data: Retrieval-Augmented Generation(RAG) · Prompt Engineering
Databases & Hosting: MySQL · SQLite · Firebase · MongoDB · Vercel · Netlify
Tools & Workflow: Git · GitHub · VS Code · Sublime Text · Figma · Power BI
Professional Skills: Problem Solving · Teamwork · Client Communication · Project Ownership

Certifications

Full Stack Web Developer (MERN)	March 2026
Django Using Python	June 2025
British Council (English Strokes)	June 2023
